CONCRETE DIAMONDS & CHEMICALS

AZTEC DIAMONDS

METAL DIAMONDS | 16-200 GRIT

Diamond 3" Metal Bond Diamonds for use on the **Aztec UltraGrind** and the **Aztec UltraEdge**. The **UltraGrind** machine has three (3) heads; each head holds four (4) diamonds; a complete set requires a set of twelve (12) diamond 3" pucks. The **UltraEdge** has one head and holds four (4) diamond 3" pucks. Diamonds are sold individually; 7-seg and 10-seg diamonds available. Approximate lifespan per set: 25,000 sqft, depending on the floor.
PART # 040-DM-XXX-7S, 040-DM-XXX

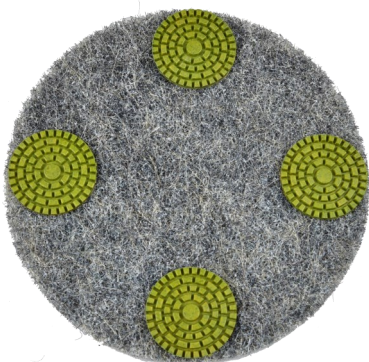

HYBRID DIAMONDS | 16-50 GRIT

Diamond 3" Hybrid Metal Bond Resin Diamond Pucks, for use on the **Aztec Refresher**, **UltraGrind** and the Aztec **UltraEdge**. The Refresher and UltraGrind machines have three (3) heads; each head holds four (4) diamonds; a complete set requires a set of twelve (12) diamond pucks. The UltraEdge has one head and holds four (4) diamond pucks. Diamond 3" pucks are sold individually. Approximate lifespan per set: 12,000 sqft, depending on the floor.
PART # 040-DH-XXX

RESIN DIAMONDS | 50-3000 GRIT

Resin Diamond 3" Pucks are designed for use on the **Aztec UltraGrind**, **UltraEdge**, or **Refresher**. The UltraGrind and Refresher machines have three (3) heads; each head holds four (4) 3" diamond pucks; a complete set requires a set of twelve (12) diamond 3" pucks. The Aztec UltraEdge has one (1) head; each head holds four (4) diamond 3" pucks; a complete set for the UltraEdge requires a set of four (4) diamond pucks. Resin diamond 3" pucks are sold individually. Approximate lifespan per set: 8,000 sqft, depending on the floor.
PART # 040-DR-XXX

10" FLOPPY DISC DIAMONDS | 50-3000 GRIT

Aztec's 10" diamond embedded discs are custom made for use on the **Refresher**. Each pad includes four (4) embedded diamond pucks; pads are sold individually. Pads are very easy to use and install with Velcro® heads. Embedded pads are excellent for marble, natural stone, terrazzo and concrete. The Refresher has three (3) heads; each machine head holds one (1) embedded 10" pad; a complete set requires a set of three (3) pads. Using a three pad system vs 12 individual diamond pucks will improve labor productivity.

CONCRETE CHEMICALS

DENSIFIER 3DHSL | 5 Gallon

Three densifiers in one product. This Hybrid Silicate Densifier is formulated with 3 different size molecule silicates to penetrate even the most difficult, tight floor cap. 3DHSL strengthens and densifies from within the concrete by providing strength at multiple levels of the slab. 3D HSL improves surface performance and resists the harmful effects of traffic wear and weathering by improving the abrasion resistance for new or aged concrete. 3DHSL is ideal for use for exposed and polished concrete, as well as integrally colored cements.

600-800 sqft / gallon

PART # 040-C-CE-5

DENSIFIER 3DHS | 5 Gallon

3D Hybrid Silicate Densifier is three densifiers in one. It improves surface performance and resists the harmful effects of traffic wear and weathering. By having three different sized molecule silicates this product fully penetrates varying densities of concrete regardless of region or hardness. This improves the abrasion resistance for new or aged concrete. 3D HS is ideal for use for exposed and polished concrete, as well as cements with integral color.

600-800 sqft / gallon

PART # 040-C-C-5

STAIN GUARD 3DSP | 5 Gallon

The 3DSP guard is a breathable semi-penetrating / semi-topical sealer that helps to protect surfaces against stains and etching. 3D SP creates a water resistant barrier that prevents liquids from infiltrating the surface, protecting against staining and color dispersion.

2000-2500 sqft / gallon

PART # 040-C-D-5

CONCRETE CHEMICALS

SOLVENT BASED SEALER SR2 | 5 Gallon

This fully penetrating stain resister is a penetrating stain repellent specifically formulated to protect polished, dyed and non-dyed concrete from oil and water-based stains. The water and oil repelling qualities of SR2 provide superior stain protection on most substrates. SR2 can be used as a standalone product, but to obtain optimum performance, the SR2 is recommended for use with 3DHS or HSL Densifiers.

3000-5000 sqft / gallon

PART # 040-C-L-5

WATER-BASED SEALER SR2WB | 5 Gallon

This fully penetrating stain resister is a water-based, penetrating stain repellent specifically formulated to protect polished, dyed and non-dyed concrete from oil and water-based stains. The water and oil repelling qualities of SR2WB provides superior stain protection on most substrates. SR2WB can be used as a standalone product but, to obtain optimum performance, SR2WB is recommended for use with 3DHS or HSL Densifiers.

2000-3000 sqft / gallon

PART # 040-C-LWB-5

REJUVENATING CLEANER | 10PK – 32oz Bottles

The Rejuvenating Cleaner is a concentrated multipurpose cleaner that removes daily debris from hard surfaces, as well as reinforces the sealer to extend the life of polished concrete floors. Rejuvenating Cleaner contains no harsh chemicals, and leaves no build-up on the surface. In addition to polished concrete, it is ideal for use on vinyl tile, ceramic tile, terrazzo, wood, and composite materials. It rejuvenates the floor by reapplying trace amounts of densifier and stain resistant additives while you clean with an autoscrubber.

600-800 sqft / gallon
